

QUALO Healthy Pathways: Web-Based Software Designed for the Strategic Management of COVID-19

QUALO Healthy Pathways was developed through close collaboration with experts in the areas of occupational medicine, human resources, and business operations. The result is a distinctive combination of management strategies and reporting tools that promote health, efficiency, and safety.

Meeting Business Needs

QUALO Healthy Pathways is a comprehensive web-based COVID-19 risk mitigation and compliance software that allows individuals to submit information to employers safely and securely from a desktop, tablet, or smart phone. Data is aggregated for business decision making, empowering leadership to maintain compliance and enforce safety measures. Notifications remind individuals to complete weekly testing and ensure leadership is alerted when employees are out of compliance so appropriate follow up action can be taken.

Implementation & Support

Advanced Metrics follows a vetted science to service implementation model that delivers software implementation support and specialized training for the initial and ongoing success of all initiatives. Our Solution Support team provides ongoing assistance to ensure questions are efficiently addressed. Enhanced support is available and is priced according to assessed need.

Security

Advanced Metrics is SOC2 certified and maintains a HIPAA Seal of Compliance.

Workflow

- **Vaccination Tracking** Individuals complete COVID-19 vaccination status forms and upload supporting documents including vaccination cards, exemption letters and human resource forms.
- **Test Results** If needed, individuals are reminded to complete weekly documentation related to testing forms, and uploading supporting documentation.
- **Leadership Reporting** Aggregate and individual information is presented in easy to digest dashboards and compliance reports.
- **Symptom Monitoring** For compliance purposes, individuals privately report COVID-19 symptoms to leadership.
- **Alerting** Text and email alerts are sent to leadership and individuals for documentation reminders and to inform compliance decisions.
- **Contact Tracing** A comprehensive user-classification system automates contact tracing and notifications for quick decision making.

Pricing

A one-time training and implementation fee ensures users are confident with system use. Monthly fees are based on staffing structure.

An Investment for Peace of Mind

QUALO Health Pathways is a data driven solution that supports businesses in the midst of evolving compliance requirements and potential staffing shortages. With Advanced Metrics Software as a Service (SaaS) approach, businesses can start with QUALO Healthy Pathways when they are ready and users have access to QUALO Healthy Pathways anytime, anywhere. The initial implementation fee is a onetime investment that guides agency champions through QUALO Healthy Pathways set up, best practice workflows, and administrative features. Solution Support, refresher trainings, built in security features, and data storage are all included in the budget friendly monthly fee.
