

Front End Application Developer

Baltimore, MD, USA Full Time

JOB DESCRIPTION

Join **Advanced Metrics** as a **Front End Application Developer** and use your passion to develop and implement innovative software solutions that have a true impact on the well-being of communities and individuals. Please email a letter of interest and resume to: careers@ametrics.org

A **Front End Application Developer** is responsible for ensuring the alignment of web design and user experience requirements, optimizing web pages for maximum efficiency, and maintaining brand consistency across all web pages. Developer will work with the technology team to design, and build various Science to Service products using Typescript, Html, CSS, and SCSS.

Job Duties and Responsibilities Include:

- Designing and developing user interfaces using Angular's best practices.
- Ensuring high performance on mobile and desktop.
- Make design and technical decisions for Angular projects.
- Writing Javascript, Typescript, CSS, and HTML.
- Creating Wireframes and design templates.
- Creating well defined components and modules in Angular.
- Cooperating with the back-end developer in the process of building and consuming a RESTful API.

Required Knowledge, Skills and Abilities:

- Proficiency in JavaScript, Angular, HTML5, and CSS.
- Professional, and precise communication Skills.
- Deep knowledge of Angular's best practices and commonly used modules.
- Creating self-contained, reusable, and testable modules and components.

- Proficient in agile development lifecycle.

Hours/Locations:

- Full-Time (40 hr/wk) Flexible Schedule.
- Advanced Metrics has offices in Lancaster, PA and Baltimore, MD, though we are able to hire staff living in PA, MD, NJ, SC, and GA to work on a fully remote basis. Must be able to travel occasionally to Lancaster, PA and Baltimore, MD for meetings. If you have any questions about location or remote work, you can reach out to hello@ametrics.org for additional information.

Advanced Metrics Team Members Experience Benefits Such As:

- Competitive Salary
- Medical Plans
- Wellness Opportunities
- Opportunities for Advancement
- Pride in Working for a Mission Driven Company
- Support to Meet Professional and Life Goals

About Advanced Metrics:

- Advanced Metrics, an affiliate of Community Services Group (CSG), is a mission driven Certified Benefit Corporation. Our team of professionals adheres to a core set of values - Trust, Quality, Mindfulness, Happiness, Integrity, Goodwill, Grit, and Partnership - that compel us to be more than a software company and guides our daily aim to Make Data Human. We believe that collected data should be of value and utilized in a straightforward and uncomplicated manner and that data collection and utilization seamlessly integrated into a practitioner's daily routine, enhancing measurement-based decision making and ultimately improving patient outcomes.

Qualifications:

- Possess a bachelor degree in Computer Science or closely related field.
- Minimum of 2-3 years' experience with ASP.net MVC/Web Forms, Web API and SQL Server (including but not limited to C#, HTML, JavaScript, T-SQL, etc.).
- Education and experience requirements can be met by obtaining a master degree in Computer Science.
- Knowledge and familiarity with HIPAA and operational data security.
- Must have the ability to obtain clearances as defined by regulations.
- Other special requirements will be determined based on the needs of the position.

How to Apply:

If you are interested in joining a multidisciplinary team of professionals dedicated to the Advanced Metrics Mission and Visions apply today!

Advanced Metrics & Community Services Group (CSG) are proud to be Equal Opportunity Employers supporting Workforce Diversity.
